

## Biodiversity and No Deforestation Commitment

Charoen Pokphand Group is committed to responsible business practices, maintaining the balance of nature, and giving priority to ecosystem restoration and biodiversity protection in accordance with internationally accepted principles, including The Rio Declaration on Environment and Development and The Convention on Biological Diversity. Supporting the UN SDG 14 (Life under Water) and SDGs 15 (Life on Land), CPG aims to halt deforestation and create nature positive impact by 2030 in our operation, subsidiaries, and throughout supply chain (including tier and non-tier supplier). The principles are lists as follows.

1. Incorporate ecosystem risks into the business risk management framework and assess potential risks and impact of deforestation/ biodiversity loss from business activities throughout value chain.
2. Apply mitigation hierarchy including avoidance, minimization, restoration, and offset shall be effectively implemented when the potential risk to biodiversity and deforestation is identified.
3. The business operation must avoid deforestation, burning, or land conversion in legal forest conservation area, high conservation value area, High Carbon Stock Approach (HCSA), Ramsar Area, Biosphere Reserve, Key Biodiversity Areas (KBAs), Alliance for Zero Extinction (AZE) and 1-4 IUCN Category I-IV)
4. Protect and restore rare and endangered species by restricted use of any harmful substance or technology throughout the value chain to protect soil health and prevent ecosystem destruction and degradation
5. Establish action plan and mitigation to prevent deforestation, preserve natural resources and restore degraded forest landscapes. The plan shall include monitoring, audit, and mitigation measure.
6. Support the procurement of sustainably sourced raw materials and ensure tracing of raw materials back to their sources to ensure that they are not derived from illegal deforestation site.
7. Encourage the supplier to have a commitment on “No deforestation” and engage with supplier to ensure that the risk of deforestation shall be managed properly during contractual period.
8. All business units have or participate in projects with a relevant national or international partner to establish biodiversity management and monitoring programs in their operations
9. Disclose performance and progress against targets on deforestation and biodiversity protection through Sustainability Report or other relevant disclosures to stakeholders annually.
